

ClearPaq

MMF

Efficient
water
filtration

The ClearPaq^{MMF} is a versatile multi-media filtration (MMF) system, designed for a wide range of applications to remove solids and turbidity from water with minimal operator intervention or supervision.

PROXA's ClearPaq^{MMF} offers reliable and robust performance in a wide range of applications. Whether used as a stand-alone filtration system, or as part of an integrated treatment process, our proprietary ClearPaq^{MMF} design enables minimal site installation and set-up.

APPLICATIONS

- Water filtration
- Potable water production
- Cooling tower side-stream filtration
- Turbidity removal from treated effluent
- Membrane system pre-filtration
- Remote sites with limited access

TYPICAL CLIENTS

Mining sites

Office complexes

Petrochemical facilities

Shopping malls and municipal systems

Food and beverage plants

The ClearPaq^{MMF} combines feed conditioning, media filtration and disinfection in a compact overall system design. This provides the client with the surety of a consistent, on-specification treated water with minimal operator input.

BENEFITS

- ▶ Guaranteed product quality
- ▶ Smart automation for maximum recovery
- ▶ Low maintenance
- ▶ Small footprint
- ▶ Modular and easy to install
- ▶ Easy integration into other water treatment processes
- ▶ Minimal site works required
- ▶ Filtration media selection leads to highly versatile application range
